

KATABAT REACT

Plug-and-play consumer portal
at your fingertips

QUICK DEPLOYMENT

With Katabat's new React, you'll have the ease and benefits of digital communication without the heavy lifting and cost often associated with integrating legacy systems.

With **plug-and-play deployment in under four weeks**, REACT offers quick start and immediate ROI.

CONSENT. CONNECT. COLLECT.

Communicate with your customers using *their* preferences.

With our optional **express consent** page, capture the SMS and email information you need to offer a superior omni-channel customer experience that translates to collecting more dollars, faster.

Katabat REACT is a pre-configured self-service consumer experience tool that lets you deploy a **plug-and-play online customer portal without the heavy lift of adopting a complex technology solution.**

REACT offers a Consent Capture page (optional), a negotiations tool to help you easily dictate repayments plans and order of negotiations for each consumer, and an abandoned cart feature that uses automated digital messaging to increase your self-service fulfillment rates.

REACT AND RESOLVE

Stay in touch with your customers through **payment completion.**

We've built pre-configured "abandoned cart" messaging that drives customers back to the platform to complete their payment experience.

CONSENT. CONNECT. **COLLECT.**
